

## **Contracted Services Provided Through KCOI Hospital**

Some services or medical products prescribed by your physician during your care at the Kansas City Orthopaedic Institute Hospital may be provided through contracted services and will be billed separately by another entity or authorized subcontractor to you or your insurance company directly.

As a courtesy, Kansas City Orthopaedic Institute will provide authorized subcontractors information necessary to bill your insurance company, worker's compensation carrier or Medicaid/Medicare for the products and services provided.

The services or products listed below may not be covered by your insurance company.

If you object to the use of any product provided through a contractor, you are responsible for discussing that objection directly with your physician prior to your procedure as your physician is solely responsible for directing your care and treatment at Kansas City Orthopaedic Institute.

Any billing questions with the below contractors should be directed through their individual offices as the Hospital staff of KCOI is not billing for the services or products provided.

**Your Orthopaedic Surgeon and Durable Medical Equipment**– You may receive a separate bill for the professional fees associated with your surgery/procedure. In addition, you may receive a bill for any specialty braces, slings, prosthetics and orthotics provided to you. This also includes the Ice Man Cold Therapy System which is prescribed by many of our physicians as part of your post operative therapy to reduce swelling and speed recovery.
